

LAPORAN TUGAS BAHASA INGGRIS

Nama : Carlos Fadellilah Rama

Modul: English for Informatics 2 (9th Edition)

Unit 2: Database

1. Database Basics

Exercise 1

Fields contained in the record:

1. Name (Aulia Akbar)
2. Department (Marketing)
3. Job Title (Sales Person)
4. Date of Birth (30/5/1990)
5. Salary (Rp. 7.000.000,-)

Other useful fields:

Employee ID, Address, Phone Number, Email Address, Date Joined, Emergency Contact.

Exercise 2

1. How many fields are there?

There are 6 fields (Name, Location, Height in meters, Status, Last eruption, ext/act/dorm).

2. How many records are there?

There are 8 records (Cotopaxi, Rainier, Hood, Chimborazo, Erebus, Etna, Lassen Peak, St. Helens).

3. List the volcanoes in North America:

Rainier, Hood, Lassen Peak, St. Helens.

4. List the volcanoes over 6,000 meters:

Chimborazo (6,272 m).

5. List the volcanoes that are believed extinct and whose heights are less than 6,000 meters:

None (In the list, Chimborazo is extinct but over 6,000 meters).

Exercise 3

1. What does box a contain?

It contains the field name being searched ('height in metres').

2. What does box b contain?

It contains the condition/selection operator ('greater than').

3. Which selection rule is entered?

'height in metres greater than 5000'.

4. What is the function of button c?

It executes/runs the search query ('Search').

5. How many records will this search find?

It will find 2 records (Cotopaxi - 5,896m and Chimborazo - 6,272m).

6. Selection rules to find:

A. All active volcanoes: `Status = act`

B. All volcanoes in South America: `Location = South America`

C. All active volcanoes in Ecuador: `Status = act .AND. Location = Ecuador`

D. All active volcanoes in South America higher than 5,500 meters: `Status = act .AND. Location = South America .AND. Height in meters > 5500`

Exercise 4 (Listening)

Part of Database Text Exercises

Design of Database Forms:

a. National police computer's database of criminal cases:

`Case ID`, `Suspect Name`, `Crime Type`, `Date Committed`, `Location`, `Investigating Officer`, `Status (Open/Closed)`

b. Dentist's database of patients:

`Patient ID`, `Full Name`, `Date of Birth`, `Contact Number`, `Medical History`, `Last Visit Date`, `Treatment Received`

c. Travel agent's database of airline tickets:

`Ticket Number`, `Passenger Name`, `Airline`, `Flight Number`, `Departure Date/Time`, `Destination`, `Seat Number`, `Price`

d. Public library's database of members:

`Member ID`, `Full Name`, `Address`, `Phone Number`, `Membership Date`, `Books Currently Borrowed`, `Due Date`

e. Language school's database of students:

`Student ID`, `Full Name`, `Course Enrolled`, `Level`, `Attendance`, `Fee Status`, `Emergency Contact`

Passage Fill-in-the-Blanks:

1. database

2. record

3. field

4. relational

5. index

6. sort

7. query

Exercise 5

1. Auto number

2. Text

3. Text

4. Number
5. Memo
6. Yes/No
7. Hyperlink
8. Date/Time
9. Text

Exercise 6

1. ``?ry`` : Finds words with three letters ending in "ry" like cry, dry, try , but will not find pray .
2. ``b d`` : Finds words starting with "b" and ending with "d" with any number of characters in between like bed, bread, bead, breed , but will not find breath .
3. ``#th`` : Finds a single digit followed by "th" like 7th , but will not find 55th or path .
4. ``Fred[ao]`` : Finds Freda and Fredo , but will not find Fredi .
5. ``Mart[!o]`` : Finds Marta and Marti, but will not find Marto.

Exercise 7

- 1.(Asterisk): Matches any zero or more characters.
Example: ``Comp`` matches Computer, Computing, and Component.
2. ``[a-z]`` (Character Range): Matches any single character within the specified range.
Example: ``[A-C]oal`` matches Goal (if lower/upper insensitive), Coal, Boal
3. ``!`` or ``^`` (Exclusion in brackets): Matches any character NOT listed inside the brackets.
Example: ``b[!a]t`` matches bet and bit, but not bat.

Exercise 8

1. Liliias Brown, Alan Brew, John Walls
Selection Rule: ``Occupation = student .AND. Age < 25``
2. John Pond, John Walls
Selection Rule: ``First Name = John .AND. Sex = M``
3. Lucy Cruden, Helen Trim
Selection Rule: ``Sex = F .AND. Age > 22 .AND. Age < 30``
4. Liliias Brown, Arnold Bright
Selection Rule: ``Residence = Los Angeles``

2. Grammatical Functions: If-Clause

Exercise 9

1. If there is a power failure, **you may** lose all your data.
2. If you have a virus, it **will probably** corrupt your files.
3. If you don't back up your files regularly, you **might** lose some of them.
4. If you choose a simple password, someone **might** access your files.
5. If you don't give your files meaningful names, you **will likely** forget what they contain.
6. If you copy pirated software, your PC **may** have a problem with computer viruses.

7. If you never read computer magazines, you **will probably** miss important new products.
8. If I know more programming languages, **I will** get a better job.

3. Data Processing

Exercise 10

- A. data collection
- B. data sorting
- C. data validation
- D. data entry
- E. data tabulation
- F. data coding

Exercise 11

Correct Sequence Order:

1. A - Data collection
2. F - Data coding
3. D - Data entry
4. C - Data validation
5. B - Data sorting
6. E - Data tabulation

Exercise 12 (Listening)

4. Data Storage Device

Exercise 13

1. Hard Drive (PC Platform): C: drive
2. Type of hard drive that plugs into a socket at the back of a computer: External/Portable Hard Drive
3. The system that works in a sequential format: Magnetic tapes and drives
4. The size and storage capacity of a floppy disk: Size is 3.5 inches and capacity is 1.44 MB

Exercise 14

1. storage
2. capacity
3. hold
4. secondary
5. archiving

Exercise 15 (Listening)

Exercise 16 (Listening)

Exercise 17

1. CD-RW / DVD-RW (or DVD+RW)
2. CD-R / DVD-R (or DVD+R)
3. CD-ROM / DVD-ROM
4. Flash memory cards (e.g., CompactFlash, Secure Digital)
5. Flash drive (or thumb / pen drive)
6. Solid-state / Flash memory
7. Format / Formatting

Exercise 18

1. Internal Hard Drive (C: Drive / SSD): Fast access and sufficient capacity for OS and applications.
2. CD-ROM / DVD-ROM or Digital Download: Standard read-only media for software/interactive books.
3. DVD / Blu-ray Disc / Digital Flash Storage: High storage capacity for high-definition video.
4. Flash Drive / Audio CD / MP3 File Storage: Convenient for audio track playback.
5. Magnetic Tape / High-Capacity External Hard Drive: Ideal for daily backup and archiving large amounts of data.
6. Flash Memory Card (SD Card): Compact, removable non-volatile storage designed for digital cameras.
